Sheth L.U.J College of Arts & Sir M.V. College of Science and Commerce Department of Information Technology (B.Sc.I.T Semester V)
Artificial Intelligence
Module II
Practical – III

Roll No.: T021	Name: neeraj Mishra
Class: TYIT	Batch:1
Date of Assignment:2-09-2026	Date/Time of Submission:2-09-2026

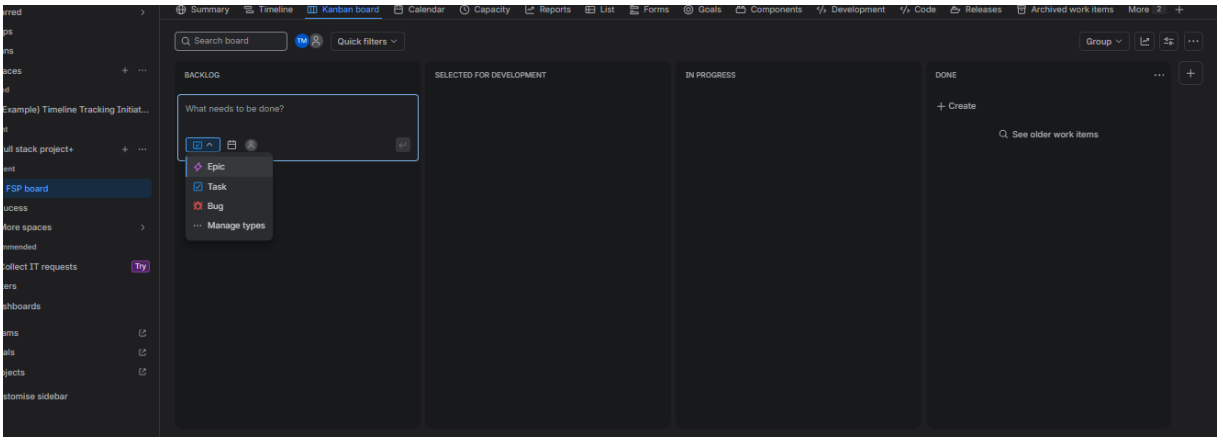

Steps

1. Open the **Full Stack Project**.
2. Open the **FSP board**.
3. View the **Kanban board**.
4. Identify the columns:
    - **Backlog**
    - **Selected for Development**
    - **In Progress**
    - **Done**

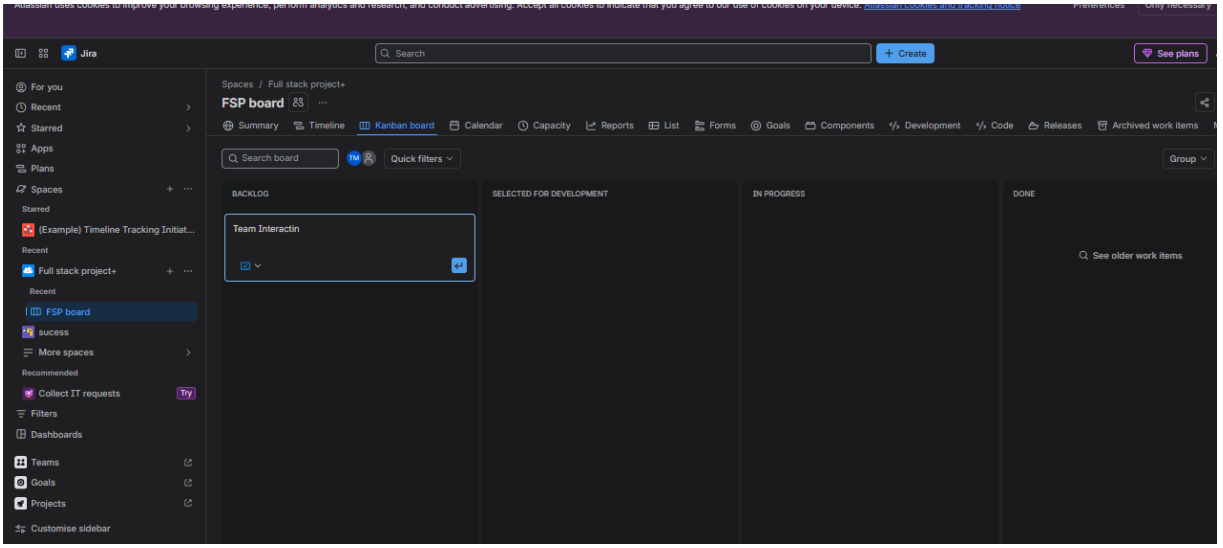

Steps

1. Go to the **Backlog** column.
2. Click **Create**.
3. A new issue card will appear with the field **“What needs to be done?”**
4. Enter the work item name, for example **Team Interaction**.
5. Click **Create** to save the issue.

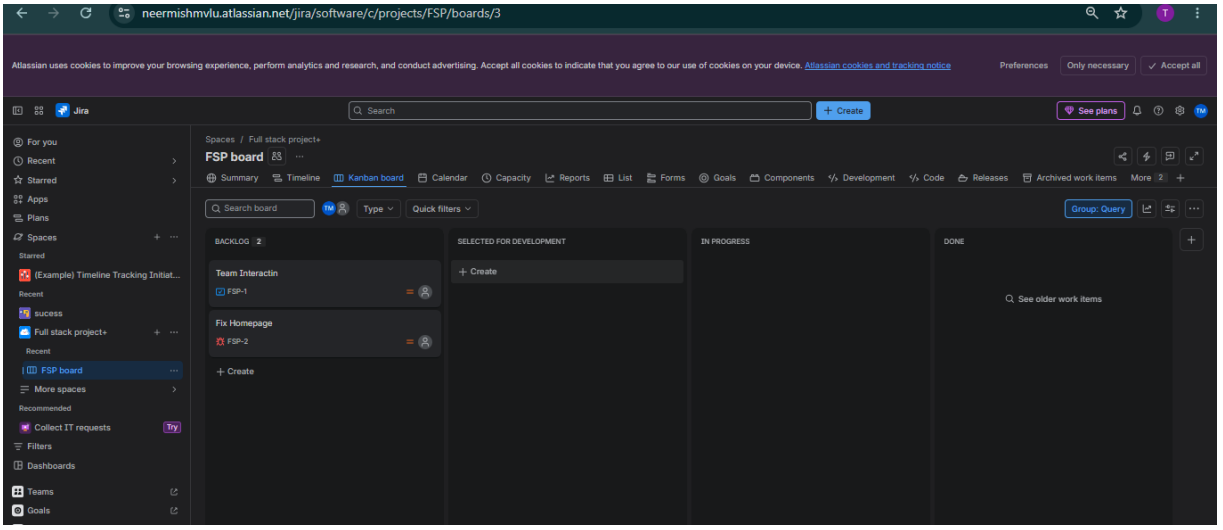

Steps

1. Click the **Issue Type** icon/drop-down on the issue card.
2. Select the required issue type:
    - **Epic**
    - **Task**
    - **Bug**
3. Choose the issue type according to the work:
    - **Task** – Specific piece of work
    - **Bug** – Problem or defect
    - **Epic** – Large body of work
4. Save the issue.

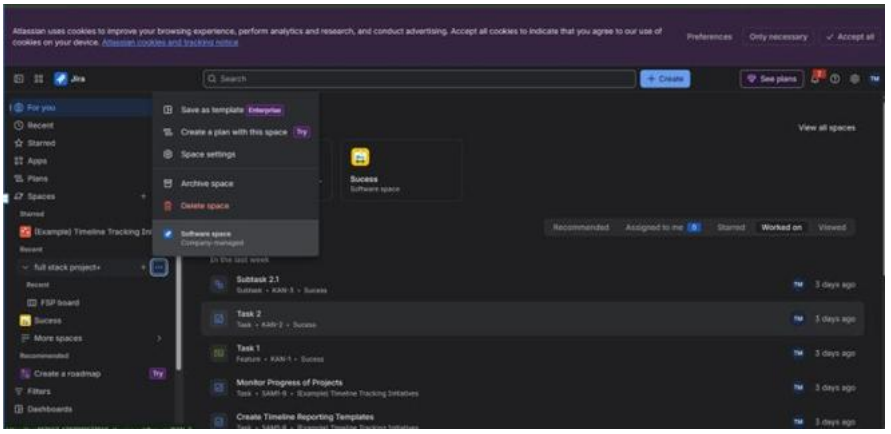

Steps

1. Select **Task** as the issue type.
2. Enter the task name, e.g., **Team Interaction**.
3. Click **Create/Enter** to create the issue.
4. Verify that the task appears in the **Backlog** column.
5. Create another issue.
6. Select **Bug** as the issue type.
7. Enter the bug name, e.g., **Fix Homepage**.
8. Click **Create/Enter**.
9. Verify that the bug appears in the **Backlog** with the **Bug** icon.

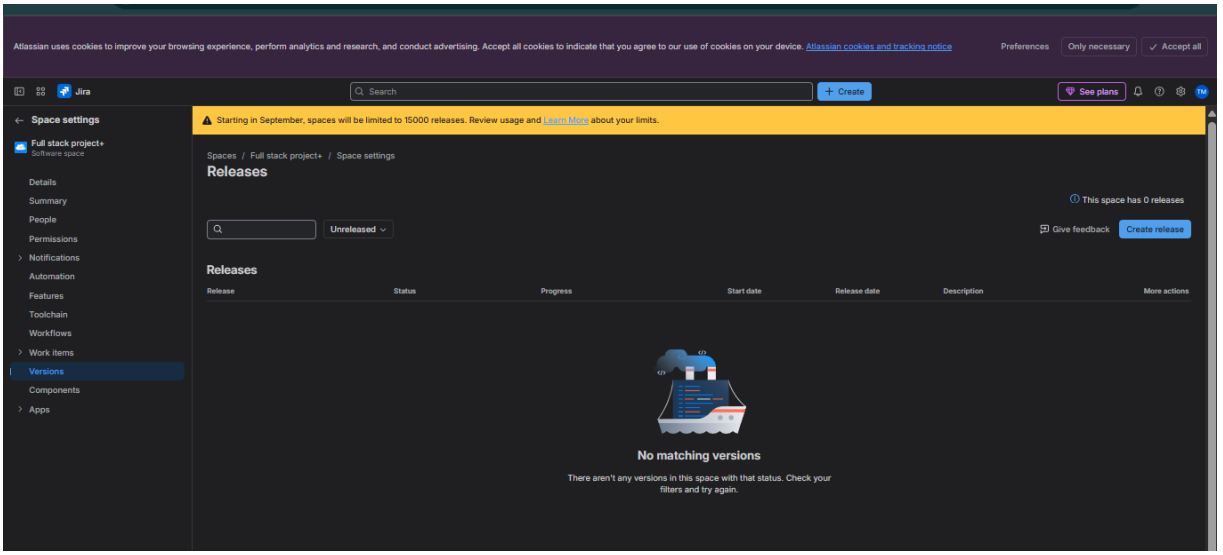

3B. Create Components and Versions

1. Open the **Full Stack Project** space.
2. Click **Space settings**.
3. Open the **Components** section.
4. Create the required components.
5. Open the **Versions** section.
6. Create the required versions.

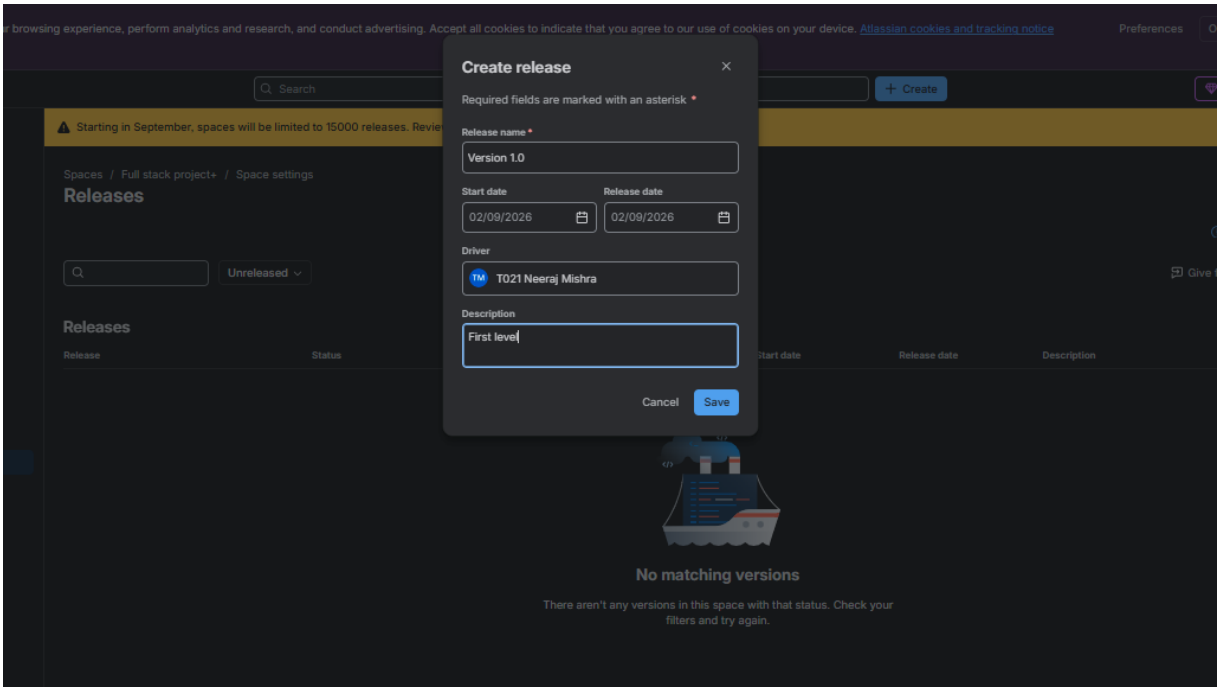

Steps

1. Click **Create release**.
2. Enter the required **release details**.
3. Enter the **Version name**.
4. Add the **Start date** and **Release date** if required.
5. Click **Create** or **Save**.

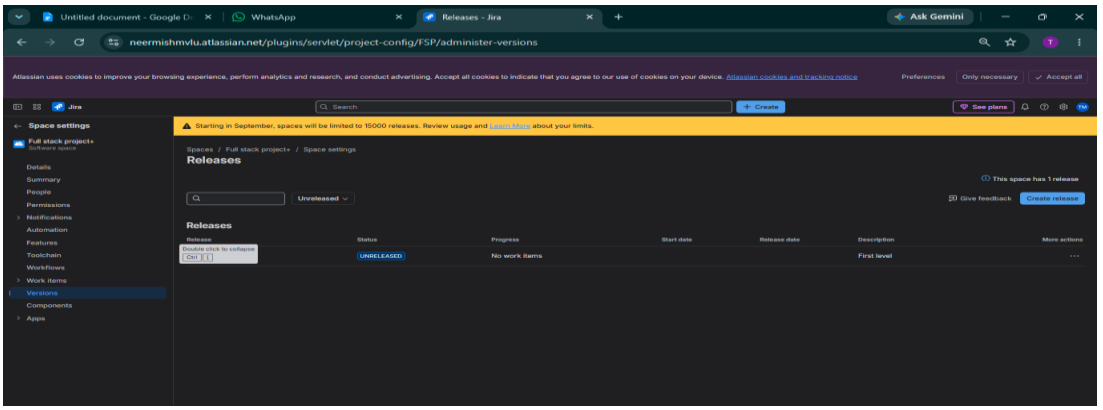

Steps

1. Enter the required **release details**.
2. Verify the information.
3. Click **Save**.

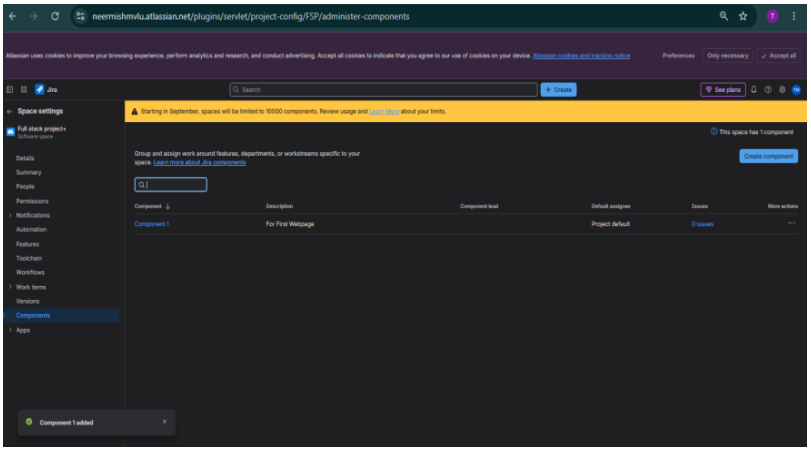

Steps

1. The **Version list** will appear.
2. Verify that the newly created version is displayed.
3. Confirm the **version name** and **release details**.

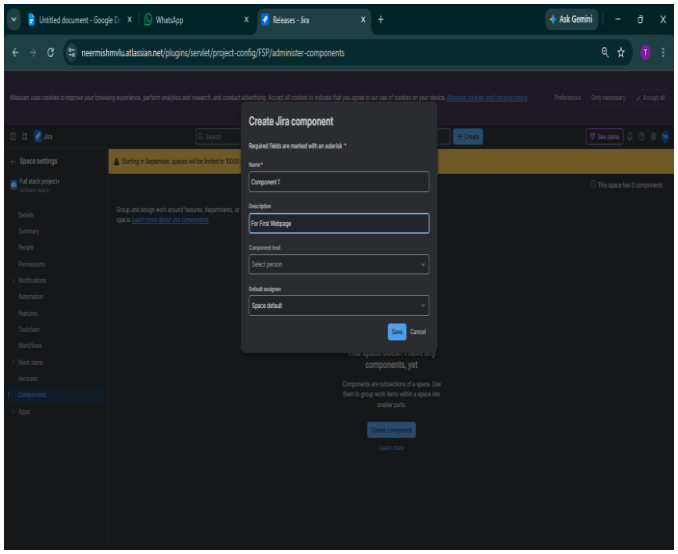

Steps

1. Click **Components**.
2. Click **Create component**.
3. Enter the **Component name**.
4. Enter the required details.
5. Click **Save**.

Steps

1. Enter the required **component details**.
2. Verify the information.
3. Click **Save**.

Steps

1. The **Component list** will appear.
2. Verify that the newly created component is displayed.
3. Confirm the **component name** and details.
